

Improving Your Vehicle Quality Through Cyclic Corrosion Tests

Cyclic Corrosion Testing (CCT) is becoming increasingly vital in the automotive industry due to its significantly better correlation with real-world corrosion behavior compared to traditional Salt Spray Testing (SST). CCT allows for accurate predictions and enhancements of a vehicle's fastener corrosion resistance.

Facil is equipped and eager to assist with all your Cyclic Corrosion Testing requirements, offering guidance towards an updated and more effective approach to surface treatment.

Test method	Standard
VICT (Volvo Indoor Corrosion Test Method) Volvo ACT I (Volvo Car)	STD 1027,1375 VCS 1027,149
Volvo ACT I (Volvo Group)	STD 423,0014
Volvo ACT II (Volvo Group) Ford ACT II	VCS 1027,1449 CETP 00,00-L467
Scania Corrosion Test Method	STD 4319
ISO Cyclic Corrosion Test Method Renault Corrosion Test Method ECCI	SS-EN ISO16701:2008 D 17 2028/D
Cyclic VDA Corrosion Test Method	VDA 233-102
